

PETITION FOR ECO-SETTLEMENTS

[https://secure.avaaz.org/ru/petition/Prezidentu Ukrainy Kabinetu Ministrov Ukrainy d_eputatam Verhovnoy Rady Utverzhdenie zakonoproekta o sozdanii ekoposeleni/](https://secure.avaaz.org/ru/petition/Prezidentu_Ukrainy_Kabinetu_Ministrov_Ukrainy_d_eputatam_Verhovnoy_Rady_Utverzhdenie_zakonoproekta_o_sozdanii_ekoposeleni/)

Each of us, conscious people, is capable of changing our own future, the future of our family, our country and the future of the entire planet Earth. And this fact is undeniable! By moving in this direction, making efforts, we are involved in the overall process on the planet Earth. Everyone makes his choice whether to take global responsibility or not.

The team “Avaaz” sends a petition once a month, sometimes even more often. Petition usually affects one of the following problems, which apparent in one or another region of the world:

1. Discrimination on any grounds.
2. Horrific forms of violence and military action.
3. The appearance of the refugees, as well as a number of the problems that they face.
4. Environmental concerns: the risk of extinction of individual life forms of flora and fauna, as well as entire ecosystems.
5. The struggle against mining, so it causes irreparable damage to resources and the Earth's ecosystem.

A lot of effort is made to solve these problems. Unfortunately, in spite of the obvious victories and achievements, the number of problems in the world is not decreasing but increasing. After all, problems will not appear and occur if the reasons, which cause them, are eliminated. This elimination requires truly global changes not only in the public consciousness and in the form of state structure, but also in the basic principles of interaction between the state and the individual. Moreover, the horrific events of our reality do not appear out of nowhere; they always have the reasons; and these reasons are the distortion in the interaction of people with each other and the state with people.

As of today trying to change, to become independent and free country, Ukraine is facing with a civil war, which is instigated by a hired army of the oligarchs. Oligarchy of Ukraine does not want to lose their positions and those enormous profits that it receives through robbing every citizen of our country practically, explicitly, and implicitly; moreover, as of today through killing most of these people in the fight for their own influence. Ukraine, which initially at the moment of Declaration of independence is declared itself beyond any hostilities and conflicts (and it was the will of all the citizens of the country), has now become the home of refugees. Many people are simply forced to run from the actions of the "loving" leaders of their own country.

It turns out that in spite of the loss of human life, nothing has changed in the country; the only change that we see is the number of killed people. Therefore, this situation is related only to the fact that the leaders of our country are the oligarchs who value only the power and money. Ukraine is being torn brutally both in internal and external conflicts of economic, political, and social nature. Thus, the blame of this ambiguity lies entirely on senior officials of our country, which was simply bribed by other greedy for power and money individuals. Just think about it: in parallel with the civil war and the a growing number of killed people, we can see that the first reservoir fracturing in the Kharkiv region for shale gas has been set; and agreements on the disposal of waste on the territory of Ukraine have been made. And such

ridiculous results have been achieved in just a few months - it's not we want to believe in, but the facts speak for themselves.

It may seem that Ukraine - is somewhere very far away and that everything that is happening in our country - does not concern you. However, it is not exactly true. After all, the actions scenario, which was developed for one country, is very easy to modify slightly and apply to another country, so to see this just take a look at the sad events of recent years, which take place here and there throughout the planet Earth. Therefore, we can no longer wait, and we should understand that!

This petition is not a fight against someone, not a search for someone to blame in the cause of what is happening. Our country has already experienced the moment when some oligarchs were replaced by others, and we finally learned through our own painful experience that changes should be much more global and must lay the foundation, which will not allow developing anything similar in the future, not only in our country but also anywhere in the world. As of today it is necessary to lay the foundations of the state, which will protect it from all those who for the sake of their own interests are ready to destroy, kill and rob all life on the planet Earth.

This petition offers a program that can make a difference both in Ukraine and in all countries of the world, which will see in this program an opportunity for development based on the creation, on the feeling of being an alive and integral part of the planet Earth. Similar bills have already been developed in some countries, but as for today none of them has not been signed at the state level and not become law.

The main goal of the program is the creation of at least 150 eco-settlements on the territory of Ukraine on 250 ha (250 people / families for each eco-settlement).

250 hectares is needed size of one eco-settlement, which will form a closed, self-sufficient, and; therefore, independent ecosystem for the entire settlement as a whole.

150 eco-villages 250 ha each is needed by Ukraine minimum that is in order to change the current situation and make real steps toward real Freedom and Independence of every citizen, as well as the whole country.

Mandatory conditions which are necessary for the formation of eco-settlements, which must be attached at the state level in the form of a law of eco-settlements.

1. Every citizen of Ukraine who wants to live in an eco-settlement (it may be a Ukrainian family or an unmarried Ukrainian, as well as every teenager who has reached the age of majority) gets 1 - 1.3 ha (but no more than that) of land for free and with the right to lifetime use of a land plot along with the right of inheritance. Eco-Settlement is inviolable ownership; it means that any part of the eco-settlement may be seized by a state or any private structure for its needs under no conditions or circumstances. That means that, as soon as the eco-settlement is formed, its geographical location is fixed by law - it is inviolable for all state and private structures. Nobody can ever sell this land (1 - 1.3 ha); in case of the refusal from the land, it can be temporarily brought under control only by the General Council of the respective eco-settlement, in which this situation has arisen; and, according to the decision of the General Council, it can be transferred to another family or citizen for lifetime use.

2. Products which were grown or produced in eco-settlements are exempted from all kinds of taxes and fees.

3. Eco-settlement is an independent administrative and territorial unit.

4. The representative body of local self-government is Council of the settlement, which consists exclusively of residents of this settlement.

5 The Statute of the Eco-Settlement implies mandatory terms of environmental friendliness, which are the responsibilities and duties of each citizen of the settlement (the full Statute of each settlement is developed separately and can be amended / modified by decisions of bodies of local self-government, but the basic principles which are described below should remain unchanged for each eco-settlement):

5.1. Ecological usage of the natural resources:

5.1.1. using only those forms of management and production, which:

5.1.1.1. do not degrade water quality;

5.1.1.2. are aimed at the restoration and renewal of soil health of every single hectare, as well as the settlement as a whole;

5.1.2. ecological usage of the natural resources involves the following mandatory restrictions:

5.1.2.1. the prohibition of oil and gas exploration and exploitation on the territory of the settlement;

5.1.2.2. the prohibition of coal mining and various types of ore mining by of raising the surface layers of the Earth, the creation of the mines.

5.2. Ecological principles of life of the inhabitants of the settlement involve:

5.2.1. the prohibition of the following forms of interaction:

5.2.1.1. any forms and types of thievery in the settlement;

5.2.1.2. any form of violence are not allowed in the settlement except violence in self-defense, protection your ha and the settlement as a whole;

5.2.1.3. manipulation of information to obtain benefits is unacceptable in the settlement by by fraud or misrepresentation, so this behavior is equated to theft;

5.2.2. any expression of the will is inviolable only if it does not manifest theft, violence and deception.

5.3. Mandatory holding of festivals and fairs.

Eco-Village, based on the principles described above, develops the system, where:

1. Discrimination is impossible because any form of theft and violence are unacceptable; each person takes responsibility for the results of their own activities;

2. Military action is impossible, as well as refugees is impossible (because there are no reasons for serious conflicts due to the acceptance of the inviolability of expression of the will of each citizen of the settlement; therefore, the acceptance of the will of every inhabitant of the Earth);

3. Environmental problems basically are impossible, because the activities of eco-settlements aimed at the restoration of all types of the Earth's resources, as well as the restoration of a variety of different forms of life of flora and fauna.

In addition, eco-villages solve the following problems:

1. Conservation of seed-stock of the Earth (genetically modified plants can not grow in eco-settlements);

2. Creation and development of the infrastructure of the settlement due to resources and funds of citizens of eco-settlement;

3. Creation and development of new forms of interaction with the flora, fauna and the Earth as a whole, which will be aimed at the joint harmonious development of human and the surrounding him nature.

We appeal to each inhabitant of the planet, with a request to support the bill of Eco-settlements in Ukraine. The development of there Settlements will help to lay needed foundation for wonderful changes in one separate country, as well as in the whole world.

If you will feel with your heart that the proposed project is a universal way out from chaos and arbitrariness for each person, then make a contribution, become implicated in the changes which will allow people of the planet Earth to become Free and Happy. We need to collect 500,000 signatures, and if possible, even more, and to explain the main conditions of the bill of eco-settlements to the leaders of our country: the President of Ukraine, the Cabinet of Ministers of Ukraine, as well as all deputies of the Verkhovna Rada.

Movement "Roza Mira"
